Subject: Re: PFAS Statement and Q&As

Good effort to pull this together. Some recommendations for consideration:

- Recommend moving the statement on safe drinking water from the body to opening paragraph
- Recommend replacing 'monitoring' in 2nd point with 'collected samples' . To me, monitoring implies a long term review.
- Recommend dropping the 3rd point.....it seems to imply a long term research project.

David,

Here is a draft PFAS statement along with Q&As. This was worked previously with HQ folks. I add a 5th question regarding the foam at ITC.
